convenient**

CambTEK®

Affordable, rapid, reproducible and convenient

Not shaken, not stirred, ultra fast Sample Preparation using **SPEX** technologies.

SPEX TECHNOLOGIES

Forced Jet Mixing (FJM)

High turnover of fluid volume for rapid homogeneity and dissolution

High Frequency Pulverizing (HFP)

Focused pulverization of whole solids into powders, enhancing rapid extraction

SPEX EXTRACTION POUCH

Say goodbye to glassware, cleaning, cleaning validation and carryover.

Step 1: Clip extraction pouch to cassette

Step 2: Add solid dosage form and solvent to extraction pouch

Step 3: Load cassette onto SPEX unit

Step 4: Dry High Frequency Pulverize, then Force Jet Mix or Force Jet Mix and High Frequency Pulverize simultaneous for quickly extracting a wide range of sample types

Step 5: Remove extracted sample from SPEX Extraction Pouch

Step 6: No cleaning, no cleaning validation, no carryover — simply dispose of the Extraction pouch

A revolution coming soon
